### **Section 5 - Fire Fighting Measures**

#### **General Information:**

Containers can build up pressure if exposed to heat and/or fire. As in any fire, wear a self-contained breathing apparatus and full protective gear. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion. Use water spray to keep fire exposed containers cool.

**Extinguishing Media:** For small fires, use dry chemical, carbon dioxide or alcohol foam. For large fires, use water spray, fog or alcohol foam. Use water spray to cool fire exposed containers. DO NOT use straight streams of water.

**Flash Point:** None

**Auto ignition:** None

**Temperature:**

**Explosion limits:** None

**NFPA Rating:** (estimated) Health: 1; Flammability: 0; Reactivity: 0

#### **Unusual Fire and Explosion Hazards:**

Product will not burn but may spatter if temperature exceeds boiling point. Extreme heat may cause closed containers to burst. Dried films of product are capable of burning, giving off oxides of carbon/nitrogen.

### **Section 6 - Accidental Release Measures**

**General Information:** Use proper personal protective equipment as indicated in section 8.

**Spills/leaks:** Absorb spill with inert material (e.g. vermiculite, sand or earth), then place it in suitable container. Avoid runoff into storm sewers and ditches which lead to waterways. Wear appropriate protective clothing to minimize contact with skin.

### **Section 7 - Handling and Storage**

**Handling:** Wash thoroughly after handling. Remove contaminated clothing and wash before reuse. Avoid contact with eyes, skin and clothing. Empty containers contain product residue and can be dangerous. Avoid ingestion and inhalation. Use only with adequate ventilation

**Storage:** Store in a tightly closed container. Store in a cool, dry, well-ventilated area away from incompatible substances.
